

iMind Transformation Announces

The Continuous Transformation Management® Framework Professional Certification 2019

A four-day course on the first **comprehensive framework** for business & organizational transformation

The discipline of managing continuous transformation is not about better work management or adding rigor – but rather it is about making the shift in paradigm to an organization continuously transforming to align with Millennium Age principles and demands.

Techniques and tools in the framework get to the heart of corporate values and culture – altering how people think about their work, their work relationships and their part in the organization and its transformation...eliminating stalls, and leveraging speed.

- Post-Course ⊕ Exam Preparation and Exam With Coaching Support (optional)

5

Reasons
to Take
This
Course

1. Learn how to leverage the universal principles of business transformation to get better transformation results, faster – regardless of what business you are in.
2. Acquire tools that equip you to be a leader of transformation success on your project, in your department or organization.
3. Measure and answer the question 'Are we transforming?' for your peers, executive, or staff.
4. Learn how to untangle the influences and cultural barriers that keep your organization from transforming – clearing a path for transformation to occur.
5. Gain insights and increase your value proposition to your organization, clients, or colleagues.
