

# Board & Executive Workshops

Spark and sustain a mindset shift that fosters the connectedness, agility, and speed needed to prosper in the post-millennium socio-economic landscape.

**KEY OUTCOME:**

Connect what you know about the *Millennium Age* with how you work, make decisions, and lead.

## Millennium mindset shifts start at the top.

### Understanding the '*Millennium Age*'

Part of rising to the challenges of the post-millennium world is understanding its nature and using that knowledge to influence your perception and movements.

### Elevation Into Cloud Computing and AI

There is a competitive edge to be had in embracing the multi-dimensionality, hyper agility, and the compression of effort needed in cloud computing and AI environments.

### Capability in Continuous Transformation

The transformation lifecycle repeats every 18 to 24 months as compared with every 10 years in the 1990s. Discrete and specific tenets mark the capabilities the corporations must have to continuously transform.

## Understanding the '*Millennium Age*'

**WORKSHOPS**

1. The principles of the *Millennium Age*, the end points of its trajectory, and how to think, move and succeed within them.
2. Concepts in transparency and humanization in business and what these mean to the ways executives lead and how their people approach their work.
3. Identifying precisely what organizational agility means for your company and the steps to take to achieve it.

## Elevation Into Cloud Computing and AI

**WORKSHOPS**

1. Exploration of the major step-change in the sophistication of work, and the associated mindset shifts in how people and processes produce results in cloud computing and AI operations.
2. Methods that prepare people for the work elevation and shifts in thinking needed in cloud computing and AI environments.
3. Pinpointing where to start in developing the capabilities in leadership, culture and worker skillsets to capitalize on cloud computing and AI.

## Capability in Continuous Transformation

**WORKSHOPS**

1. The lifecycle of continuous transformation and the tenets that create a successful continuously transforming organization.
2. Leading and working effectively in hyper-agile and high ambiguity contexts.
3. Concepts in change intelligence and their practical application for corporations.
4. Breakthrough techniques that propel the organization toward the transformed state and create an advantageous position for the next transformation.
